The Joomla! Project has assembled a top-notch team of experts to form the new Joomla! Security Strike Team. This new team will solely focus on investigating and resolving security issues. Instead of working in relative secrecy, the JSST will have a strong public-facing presence at the Joomla! Security Center .

The new JSST will call the new Joomla! Security Center their home base. The Security Center provides a public presence for securit y issues and a platform for the JSST to help the general public better understand security and how it relates to Joomla!. The Security Center also offers users a clearer understanding of how security issues are handled. There's also a news feed , which provides subscribers an up-to-the-minute notification of security issues as they arise.
